

# Stop the Destruction of Our Homes in Barrington, IL

CN Train Crossing #260 515D at IL Route 59 (Hough Street)  
Vibration from high-speed Canadian National Railway (CN)  
freight trains is damaging our homes and threatening the  
future of our community.

**For more info see: <https://cadhcr.com>**

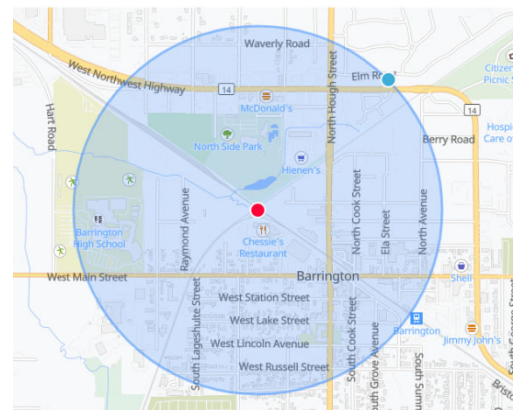

## **What's Happening:**

- CN freight trains pass through the rail crossing at speeds up to 45 mph, where their tracks intersect Metra's Union Pacific Northwest Line.
- This creates extreme ground vibration, causing:
  - Cracked foundations and porches
  - Shaking beds and cabinets
  - Structural damage to homes and businesses
- Beyond the visible cracks in walls or damaged foundations, there is a deep emotional toll on residents' health and well-being.
- Residents are being forced to leave due to unbearable living conditions.

## **What We're Demanding:**

- The Federal Railroad Administration (RFA) to reduce CN trains' maximum speed limit to 25 miles per hour (mph).
- Stop further properties' deterioration.
- Seek fair compensation for damage already occurred.
- Action from CN, FRA, and elected officials.

## **Sign the Petition:**

- Sign online petition at: <https://chnng.it/LHMPrrQ6gK>
- Help spreading this information on social-medias of your choice.
